LIVE PREVIEW

Create Live Code Examples in Spectacle!

Supports Light and Dark Syntax Themes

SOURCE CODE

```
/**  
 * Sample React Component  
 * Output domContainerNode is 'mountNode'  
 */  
  
const styles = {  
  heading: {  
    fontSize: "2.25rem",  
    fontWeight: "bold"  
  },  
  copy: {  
    fontSize: "1.5rem"  
  }  
}  
  
const HelloWorld = ({ name }) => (  
  <div>  
    <h1 style={styles.heading}>  
      Create Live Code Examples in {name}!  
    </h1>  
    <p style={styles.copy}>  
      Supports Light and Dark Syntax Themes  
    </p>  
  </div>  
)  
  
render(  
  <HelloWorld name="Spectacle" />,  
  mountNode)
```

A dark, atmospheric city street scene, likely New York City, at night or in low light. The street is lined with tall, multi-story buildings, many with fire escapes. Parked cars are visible on both sides of the street. A sign for "FOCK N ROLL HALL" is visible on one of the buildings. The overall mood is moody and urban.

FLEXIBLE LAYOUTS

LEFT

RIGHT

Wonderfully formatted quotes

- Ken Wheeler

INLINE MARKDOWN

You can write inline images, [Markdown Links](#), paragraph text and most other markdown syntax

- Lists too!
- With ~~strikethrough~~ and *italic*
- And let's not forget **bold**

Create Multiple Slides in Markdown

All the same tags and elements supported in <Markdown /> are supported in MarkdownSlides.

Slides are separated with **three dashes** and can be used *anywhere* in the deck. The markdown can either be:

- A Tagged Template Literal
- Imported Markdown from another file

**SMOOTH
COMBINABLE TRANSITIONS**

- Inline style based theme system
- Autofit text
- Flexbox layout system
- PDF export
- And...
